

# REXONEYE

## REGENERATIVE TECHNOLOGY FOR THE TREATMENT OF DRY EYE

Rexon-Eye® is the latest generation medical device for the treatment of dry eye, using Quantum Molecular Resonance (QMR®).

This innovative non-invasive therapy is able to stimulate the natural regeneration of cells to restore the correct functioning of both lacrimal and Meibomian glands.

In just a few sessions, the pleasant and relaxing Rexon-Eye® treatment delivers stable and long lasting benefits to dry eye sufferers (clinical benefits supported by several international clinical studies).

PLEASE ASK YOUR SPECIALIST FOR MORE  
INFORMATION ABOUT REXON-EYE®
